

# Jean Pierre André Ayala Viera

I am a self-taught person in the world of programming, with a great passion for learning and creating innovative solutions. I like to face new challenges and solve complex problems with creativity and efficiency. I am disciplined, curious, adaptable and always up to date with the latest trends and technologies in the industry. Solid knowledge in and data modeling. Main goal to apply my learned knowledge in a project or organization where I actively participate. Interested in Frontend Development.

Languages: Spanish (native), English (Intermediate)
